

FEATHER RIVER RAIL SOCIETY – AGENDA REPORT

DATE: August 10, 2012
FROM: Rod McClure - President
ITEM: President's Report

WP 1503 - 1503 is alive and well thanks to Seth. Still having problems with the wheel slip relay.

Mechanical - Dave McClain and Dwight Whetstone finished all cylinder replacement on SP GP9 2873 and it no longer spews oil. They checked the Quincy 1000 and found the spark arrestor was full of oil and junk. That has been drained and fixed. They are now focusing on the WP 501 for repair.

Museum Store - Big thanks to The Girls and Boys in the gift shop. They are kicking ass.

Portola Railroad Days - Our Hot Dog vendor from Reno canceled out, but Gail has someone else lined up for RR days.

Trackwork - Greg Elems will be organizing a track work weekend after RR days to fix the balloon.

Oroville Turntable - Have not heard back from Tom Grey about moving the turntable from Virginia City.

Norm Equipment Move - Waiting to hear back from Scott Franklin about moving Norm's equipment. Talked to him last on Thursday and he was to get back to me today with information on Plumas County permits

Fourth Street House - Gail went down to Quincy and resolved the tax and title issues with the house in person. Should have a clean title in a few weeks. Now, if I can get the appraiser to call me back....
