### **PAINTING WESTERN PACIFIC GP7 705**

Proposing that the next big paint job we tackle be the WP 705. There are some questions we need to settle and we need to define a budget.

It has been agreed upon that the 705 will get green paint with the WP on the nose, since that is all it ever had as a green unit. I would like to move forward with prepping it as soon as I finish painting the SN bay window in primer. Hopefully the new paint will spur the funds to come in to work on the mechanical needs.

Questions:

- What quality of paint?
- Replace all the windows that are broken or missing?

**REQUESTED ACTION:** Approve painting plan and budget.
