PULLMAN 8300 TROOP SLEEPER DISPLAY

Norman Holmes sent us the following email:

While visiting the museum I talked to two board members about the possibility of moving our Troop Sleeper to track #2 in front of the diesel shop. This would become a memorial to members of the Army Transportation Corps and would attract other visitors. I propose to have artificial turf beneath the car and a plaque on the side to state, "that this car honors Transportation Corp members of WWII and the Korean Conflict." This could happen quickly without much cost and could be completed by November 11, Armed Forces Day. American Legion and/or VFW could participate in its' participation.

Our WW1 ordinance boxcar could be added to the track with a donation request to refurbish the car.

I hope this is presented at the next board meeting and I would happy to make a donation.
